

Mathew Musango Peter

Senior Platform Engineer | AWS · Kubernetes · DevSecOps

Email | [LinkedIn](#) | Nairobi, Kenya

Professional Summary

With over 10 years of experience in IT, I currently serve as Deputy IT Manager at Eclectics Intl., where I lead cross-functional teams in managing enterprise infrastructure, cloud transformation, and security operations within PCI-DSS compliant environments. My expertise spans hybrid cloud platforms, Kubernetes, virtualization with Microsoft Hyper-V, and automation, ensuring scalable and secure IT operations for diverse clients.

At Eclectics Intl., I focus on integrating security and compliance into CI/CD pipelines, building centralized observability platforms, and architecting disaster recovery strategies to reduce operational risks. I am committed to fostering operational excellence, service reliability, and continuous improvement, while aligning technology initiatives with business goals to achieve impactful results.

Core Competencies

- **Platform Engineering & Cloud:** Kubernetes, Docker, Helm, Cilium, Cni, Cri, Harbor, Directpv, Metallb, Aws, Gcp, Azure, Direct connect, Security groups, Terraform, Ansible, Gitlab, Git, Argo cd, Jenkins, Gitlab ci, Sonarqube, Artifactory, Selenium, Kroki
- **Systems:** Linux, Centos, Rhel, Windows server, Kvm, Vmware vsphere, Microsoft hyper-v, Nginx, Apache, Pfsense, Bgp, Ospf, Stp, Vpn, Dns, Dhcp, Snmp, Qos, Mpls, Sd-wan, Nac, Asa, Ids/ips, Vlans, Bash, Python
- **DevSecOps & Security:** Wazuh, Trivy, Clair, Siem, Hashicorp vault, Cis hardening, Security monitoring, PCI DSS
- **Observability & Reliability:** Prometheus, Grafana, Loki, Tempo, Mimir, Opentelemetry, Nagios, Icinga, Elk stack, Incident management, SLO/SLAs
- **Leadership & Strategy:** Team leadership, Tech roadmaps, Budgeting, Infrastructure governance

Professional Experience

Deputy IT Manager

Eclectics Intl. *April 2021 – Present*

- Lead multi-region DevOps & Systems Engineering teams, defining infrastructure strategy and operational governance
- Architect and manage hybrid cloud platforms with Kubernetes, high availability, and autoscaling
- Build centralized observability platforms with Prometheus, Grafana, Loki, and OpenTelemetry
- Integrate security & compliance into CI/CD pipelines; achieved PCI-DSS compliance
- Develop disaster recovery and business continuity strategies, reducing operational risks
- Deployed multi-region Kubernetes clusters with auto-healing and load balancing

- Standardized CI/CD pipelines and platform automation, improving deployment efficiency
- Reduced downtime and improved incident response via proactive monitoring dashboards

Senior System Administrator

Eclectics Intl. *January 2019 – March 2021*

- Managed Linux and Windows enterprise infrastructure; implemented centralized monitoring and alerting
- Conducted CIS hardening, PCI DSS compliance, and security framework implementation
- Optimized system performance, uptime, and reliability through proactive tuning and automation
- Collaborated with development teams to improve deployment workflows and application performance
- Developed automated monitoring dashboards for real-time visibility
- Reduced incident response time and improved system uptime

System Administrator

Eclectics Intl. *October 2017 – December 2018*

- Supported daily operations of Linux and Windows servers, firewall policies, and network configurations
- Assisted in PCI DSS compliance and infrastructure security hardening
- Maintained operational documentation and participated in incident response
- Maintained high system reliability and contributed to early monitoring and automation initiatives

ICT Technician

Kenya Marine and Fisheries Research Institute (KMFRI) OFFICIAL *June 2015 – September 2017*

- Installed, removed, configured, and troubleshoot peripheral devices and network cabling
- Provided desktop support and maintained hardware inventory

Key Projects

- **BCP implementation:** Use Veeam Backup and replication Solution, to replicate virtual Machines to DR, and on-site backups.
- Built a scalable Kubernetes environment with MetalLB, DirectPV, and MinIO.
- **Client Migration to AWS:** Led the migration of client infrastructure from on-premises to AWS, designing and implementing a scalable and secure cloud architecture, resulting in improved performance, reduced costs, and enhanced disaster recovery capabilities.
- **DevSecOps Environment Setup:** Created a comprehensive DevSecOps environment including Mimir, Loki, Tempo, Harbor, GitLab, Artifactory, SonarQube, Selenium, Kroki, Argo CD, Jenkins, and Grafana, enhancing development, security, and operational workflows.
- **Email Migration:** Successfully managed the migration of email services from G Suite to Microsoft 365, ensuring data integrity and minimal downtime during the transition.
- Implemented enterprise-wide monitoring using Grafana, Mimir, Loki, and Zabbix.

- **Kubernetes Environment Setup:** Built a robust Kubernetes environment, implementing ingress controllers, DirectPV, MetalLB, and MinIO NFS provisioner to support scalable, high-availability applications.
- **Monitoring Environment Implementation:** Established a monitoring environment with Grafana, Mimir, Loki, Wazuh, and Zabbix to ensure comprehensive system monitoring and logging.
- **PCI-DSS:** Implemented the CIS hardening standards, plus internal custom policies to meet the PCI-DSS standards.
- **Wikimedia Setup:** Implemented a Wikimedia instance to enhance knowledge sharing and collaboration within the organization, including custom configurations for enhanced security and performance.

Certifications

AMAZON WEB SERVICES

- AWS Certified Solutions Architect – Associate
- AWS Certified Solutions Architect – Professional

GOOGLE

- System Administration and IT Infrastructure Services – Google

THE LINUX FOUNDATION

- LFC102: Inclusive Open Source Community Orientation
- LFC114: Remote Work at Scale
- LFC192: Generating a Software Bill of Materials
- LFEL1004: Authentication & Authorization for Web/API
- LFEL1006: Securing Projects with OpenSSF Scorecard
- LFEL1007: Automating Supply Chain Security - SBOMs and Signatures
- LFEL1014: Scaling Cloud Native Applications with KEDA
- LFS111: Open Source and the 5G Transition
- LFS142: Introduction to Backstage - Developer Portals Made Easy
- LFS144: Introduction to Istio
- LFS146: Introduction to Cilium
- LFS148: Getting Started with OpenTelemetry
- LFS151: Introduction to Cloud Infrastructure Technologies
- LFS157: Introduction to Serverless on Kubernetes
- LFS158: Introduction to Kubernetes
- LFS162: Introduction to DevOps and Site Reliability Engineering
- LFS167: Introduction to Jenkins
- LFS169: Introduction to GitOps
- LFS180: Introduction to DevSecOps for Managers
- LFS183: Introduction to Zero Trust
- SKF100: Understanding the OWASP Top 10 Security Threats

UNIVERSITY OF COLORADO

- Enterprise System Management and Security - University of Colorado

Education

- **The Technical University of Mombasa** — Bachelor's Degree, Information Technology · (2012 - 2016)
